

ASIC, Ghana Conference

Save the Date!

October 17-19, 2023

The next installment of the Air Sensors International Community's International Connection Hub will be in Accra, Ghana October 17-19, 2023. Our Technical Program Committee is excited to welcome folks from across the continent to discuss small air quality sensors that can be used to improve monitoring throughout West Africa and beyond!

What will be discussed?

Over three days, the conference will start with a basic training day on air quality and sensors on the first day, then move into presentations on how to build capacity within current air quality sensing practices on day two, and the final day will be a deeper dive into what research is still needed, where systems can be improved and what lessons have been learned.

Topics Include:

- Air Quality & Health Connections
- Sensor Evaluation
- Understanding Data
- Communicating Air Quality Data
- Community-based Participation
- Policy Management

- Academic & Regulatory Gaps
- Data Collection, Analysis & Interpretation
- Sensor Network Development
- Turning Data into Action
- Air Quality Management
- Developing Avenues of Funding

Of course, if you are interested in participating, sharing your knowledge or learning from others, we welcome you to attend! [You can sign up here to stay informed.](#)

How can you help?

In order to ensure this conference reaches the right audiences and that this educational event accessible to the most people possible, *we could use YOUR help!*

BECOME A SPONSOR: We are providing travel and attendance grants to many attendees participating from African countries. Due to this we are asking for

generous financial support from ASIC partners to make the event successful and ensure air quality improvements can continue to spread across the globe. We invite you to be a conference sponsor by supporting the planning efforts or travel of participants.

BECOME AN OUTREACH PARTNER: We also need to know which organizations should be involved. If you are partnering with an organization, government department or community group that is aiming to improve air quality in their region, please let us know! You can forward this message or directly share their information with ASIC.

Please connect with ASIC Manager, Sandra Hall, sehall@ucdavis.edu to review sponsorship opportunities that will showcase you as a leader within the air quality sensors field or to support the outreach efforts.
