Air Sensors International Conference, *India*

Friday, August 26 - Bangalore, India

Submit an abstract for ASIC, India!

With the biannual **ASIC, North America** completed, we are excited to turn our attention to hosting you at **ASIC, India** in August! Through a partnership with the Center for the Study of Science, Technology and Policy (CSTEP), our Technical Program Committee is currently developing a program and sending out letters of invitation, but we want to ensure everyone has the opportunity to participate in our first conference outside of the U.S..

Do you conduct research with small, affordable air quality sensors within India or a surrounding country? Have you built a air quality monitoring network in your community? Do you have research that would be valuable to supporting the **ASIC, India vision and goals**? Do you have projects surrounding one of our core topics below?

- Session 1A: Data Modeling & Analytics
- Session 1B: Choosing & evaluating a Sensor; co-location & calibration
- Session 2A: Data Assimilation, Sharing & Harmonization
- Session 2B: Network Design & Monitor Siting; Running a Network; long-term network maintenance
- Session 3: Performance Targets & Sensor Calibration; regulation; sharing data
- Session 4: Real World Sensor Applications

Then we encourage you to submit an abstract for consideration! Our team is accepting abstracts now through July 1st for both oral presentations and poster presentations. Please note that this conference will only be accepting in-person presentations at the moment.

Official Topics Available: April 25, 2022
Abstract Submissions Open: Today!
Abstract Submissions Close: July 1, 2022
Abstract Submissions Notifications Out: July 20, 2022

Submit an abstract

Be a Sponsor or Exhibitor

The air quality sensor market in India is rapidly expanding with community members, educators, industry developers, and regulators looking for the best sensor technologies and network management systems. With a full session dedicated to Air Sensors in India at the 2022 ASIC, North America, and more presentations scattered throughout the conference sessions on India and other Countries within Asia, it's clear this developing market is ready to incorporate sensors into their communities.

Join us as a sponsor or exhibitor at our first conference held internationally and share your work with a brand new set of people interested in air quality sensors.

Email Sandra to Discuss Opportunities

India Clean Air Summit

ASIC, India is being developed in partnership with CSTEP's India Clean Air Summit (ICAS). The India Clean Air Summit is being held August 24-25, 2022 with a focused theme of "Looking at Air Pollution through a Climate Lens."

ICAS will bring to the table two of the most pressing global issues of our time— climate change and air pollution. Discussions will address the critical linkages between these and explore how working on these issues in tandem can help synergize policy decisions to make them comprehensive and effective. Considering the urgency of the climate crisis and the health toll due to air pollution, this is the need of the hour. ICAS 2022, with ASIC, will examine these issues at research, policy, and engagement levels.
