

# Air Quality Monitoring and Emissions Reduction at the Community Level in California: A New Paradigm

John R. Balmes, MD

University of California, San Francisco and Berkeley

# Disclosure

- I am the Physician Member of the California Air Resources Board

# Air Quality Regulation in the U.S.

- California Air Resources Board (1967)
- U.S. EPA (1970)
- National Ambient Air Quality Standards

# Tackling Air Pollution

FEDERAL • STATE • LOCAL

## US EPA

Sets & enforces national air quality standards.  
Regulates interstate transportation.

TRAINS

PLANES

SHIPS

## California Air Resources Board

Regulates mobile sources of air pollution,  
greenhouse gases & consumer products.

CARS

TRUCKS

BUSES

## Local Air Districts

Regulates stationary & local  
sources of air pollution.

FIREPLACES

FACTORIES

REFINERIES

POWER PLANTS

# The Major Sources of Greenhouse Gases and Aerosols also Contribute to Air Pollution

# California's AB 32 – Global Warming Solutions Act

- The primary goal of AB 32
  - reduce GHG emissions to 1990 levels by 2020 (a 30% reduction)
  - 80% reduction below 1990 levels by 2050
- Required a “scoping plan”
- Strategies considered included market-based mechanisms such as a carbon tax or cap-and-trade system

# AB32 Has Led to a Paradigm Shift

- All regulations now are evaluated re: both climate change mitigation and health co-benefits.
- Focus now on emission reduction rather than ambient air quality
  - i.e., regulate sources rather than at the regional air quality level

# Market Mechanism to Reduce Carbon Emissions

- Cap-and-Trade
  - Caps carbon emissions
  - Price of carbon fluctuates
  - Complicated to administer
- Carbon Tax
  - Variable carbon emission reductions
  - Fixed price of carbon
  - Simpler to administer
  - ***Politically difficult***

# How Cap-and-Trade Works

# Senate Bill 535

**INVESTMENT JUSTICE  
THROUGH THE GREENHOUSE  
GAS REDUCTION FUND**

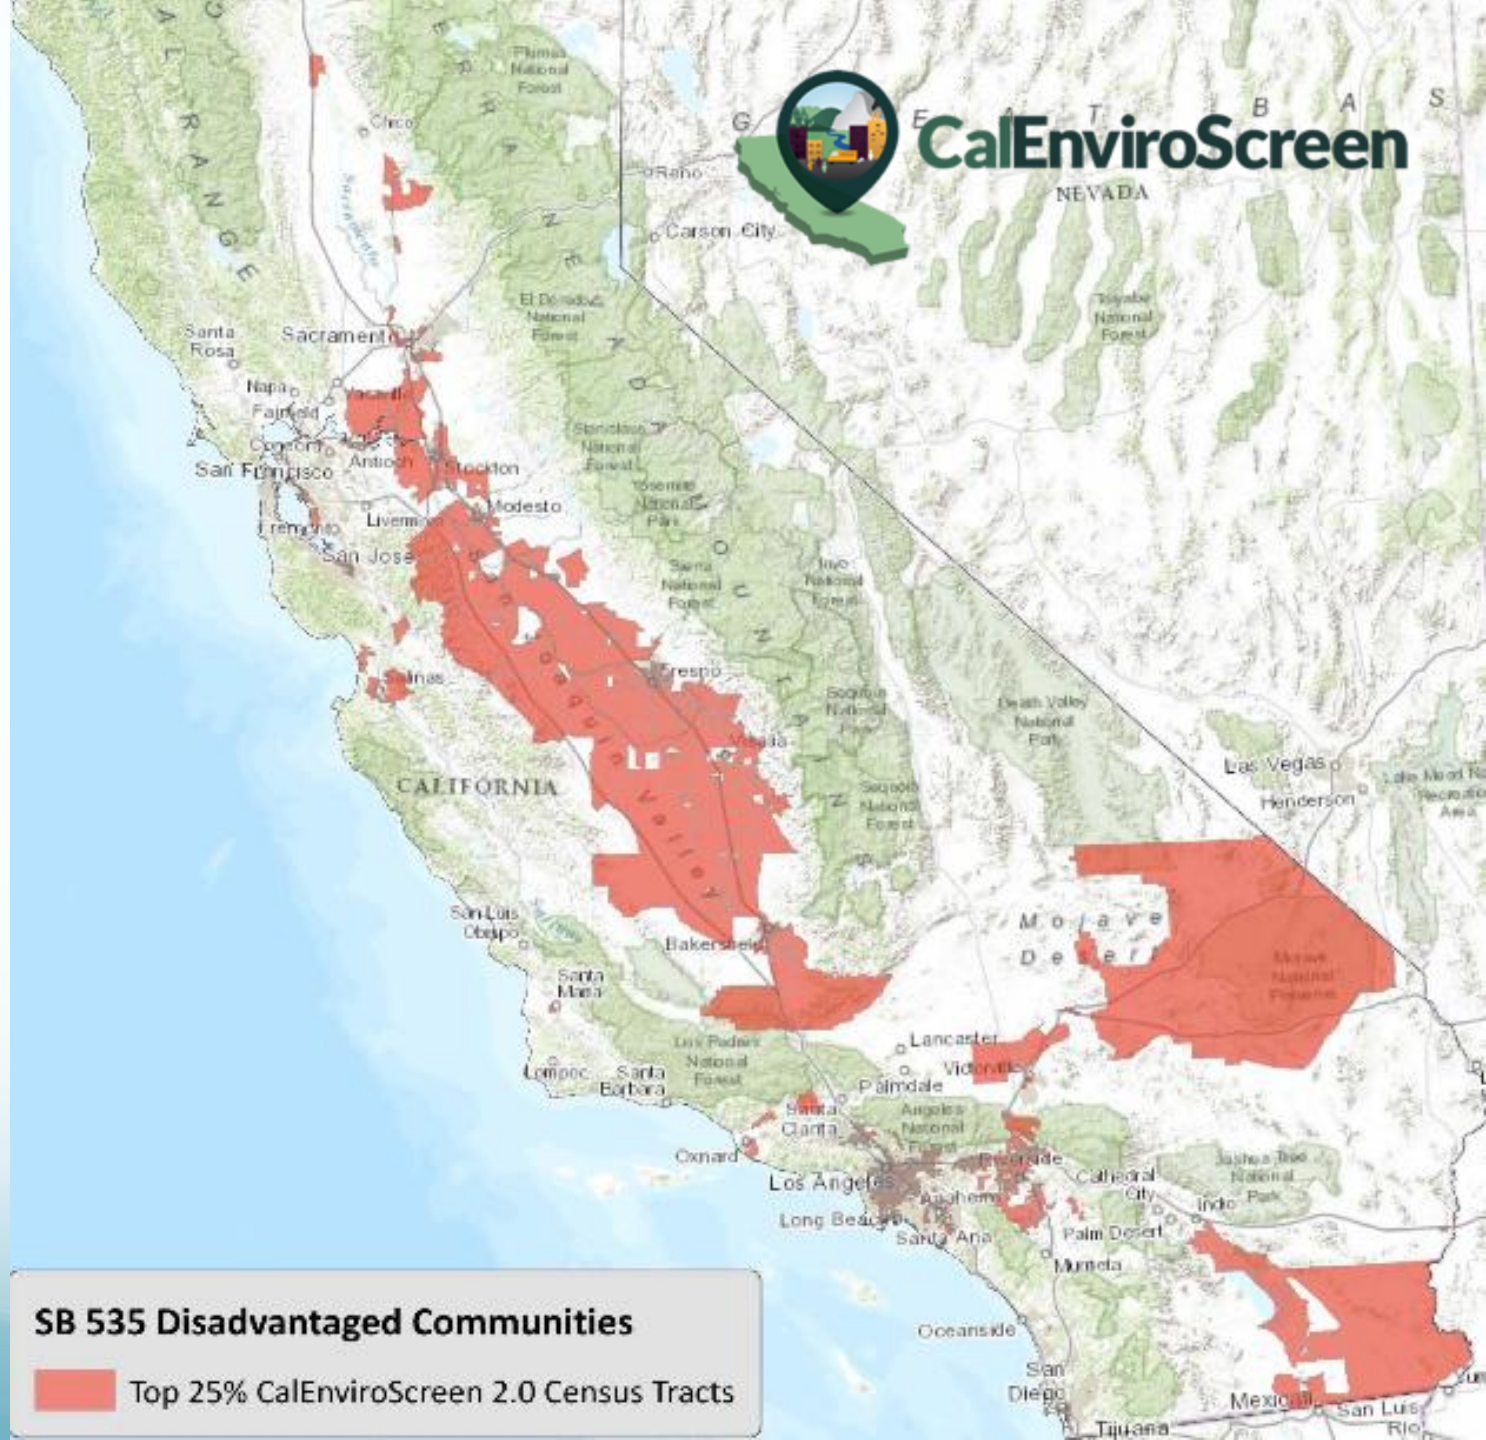

SB 535 Workshop - Friday, March 21, 2014  
Hosted by the UCLA Luskin Center for Innovation

- Cal EnviroScreen identifies disadvantaged communities

CalEnviroScreen

**SB 535 Disadvantaged Communities**

Top 25% CalEnviroScreen 2.0 Census Tracts

# Assembly Bill 1550

- Requires that 35% of cap-and-trade revenue
  - is spent on projects that benefit disadvantaged communities
  - at least 25% is spent on projects located in disadvantaged communities
- Cal Enviroscreen identifies disadvantaged communities

# A PRELIMINARY ENVIRONMENTAL EQUITY ASSESSMENT OF CALIFORNIA'S CAP-AND-TRADE PROGRAM

By Lara J. Cushing<sup>1,5</sup> Madeline Wander<sup>4</sup> Rachel Morello-Frosch<sup>1,2</sup>  
Manuel Pastor<sup>4</sup> Allen Zhu<sup>3</sup> James Sadd<sup>6</sup>

# Cap-and-Trade Inequity?

**TABLE 3**

Characteristics of Neighborhoods within 1.5 miles of GHG-emitting Facilities  
(N=255 facilities)

	Block groups with at least one facility within 1.5 miles (N=2,710)	Block groups with no facilities within 1.5 miles (N=20,392)
Mean % People of Color	66%	57%
Mean % People Living Below Twice the Poverty Level	44%	35%
% of Block Groups in a "Top 10%" CalEnviroScreen tract	20%	9%
% of Block Groups in a "Top 20%" CalEnviroScreen tract	36%	18%

# AB 398

- Extend's CARB's authority to implement the cap-and-trade program through 2030
- To achieve 2/3 majority for passing AB 398, support need from legislators with concerns about environmental justice issues related to cap-and-trade
- AB 617 was a companion bill written to address EJ concerns

# AB 617

- Mandates CARB to develop guidelines for community air quality monitoring
- Requires local air districts to work with communities identified by CARB as having high cumulative exposure burden
  - To develop plans for community air quality monitoring to determine local “hot spots”
  - To review the results from such monitoring to develop community emission reductions programs
- CARB must review the community emission reduction programs and provide grants to community-based organizations to assist their participation in the programs
- Best available retrofit control technology must be used if the district is in non-attainment for one or more pollutants
- Requires stationary sources to report their annual emissions of criteria air pollutants and toxic air contaminants to CARB

Figure 1 Community-Focused AB 617 Elements

**Figure 2      New Actions under the Community Air Protection Program**

**Partnerships with community members** in Program development through community assistance grants and community steering committees, where community members and local air districts will work together to craft solutions for each selected community.

**Community-specific emissions reduction programs** that will target new local actions to reduce emissions directly within selected communities.

**Mechanisms for community members** to assess the effectiveness of the Program through measurable outcomes, metrics to track progress, and annual public reports.

**Engagement with local land use and transportation agencies** to help reduce the current impacts of sources that sit too close to residents and to avoid these situations in the future.

**Incentive investments** to help purchase cleaner vehicles and equipment, with a focus on advancing zero emission technologies within impacted communities.

# New Actions under AB 617 cont.

**New statewide actions** to reduce emissions from sources that are concentrated within heavily impacted communities throughout the State and consider ways to target these actions to reduce localized exposure.

**More detailed information on air pollution within communities** through new community air monitoring programs led by both air districts and community-based organizations.

**Better information on pollution sources within communities** through new requirements for reporting emissions data and making data more accessible and user-friendly.
