

2022 Air Sensors International Conference

Advancing Science and Engaging Communities

May 11 – 13, 2022
Pasadena, California

Reminders

- Please silence your cell phones and computers for the duration of the sessions, but keep them at the ready for questions!
 - ❖ Use Whova for Q&A: **whova.com/portal/webapp/asic_202112/**
- Please remember that all sessions are timed and questions may be limited. Thank you for helping us stay on schedule!
- All sessions will be livestreamed through the virtual platform, Whova. Every Conference attendee has access to Whova.
 - ❖ If you need technical support, please contact the Conference Managers, Sandra Hall at sehall@ucdavis.edu and Olivia Schlanger at oschlanger@ucdavis.edu

How and why cities are using new sensor technologies:

Successes, challenges, and funding to achieve air quality goals

C40 Cities, Clean Air Fund, and representatives from Addis Ababa, Denver, Lima, and Lisbon

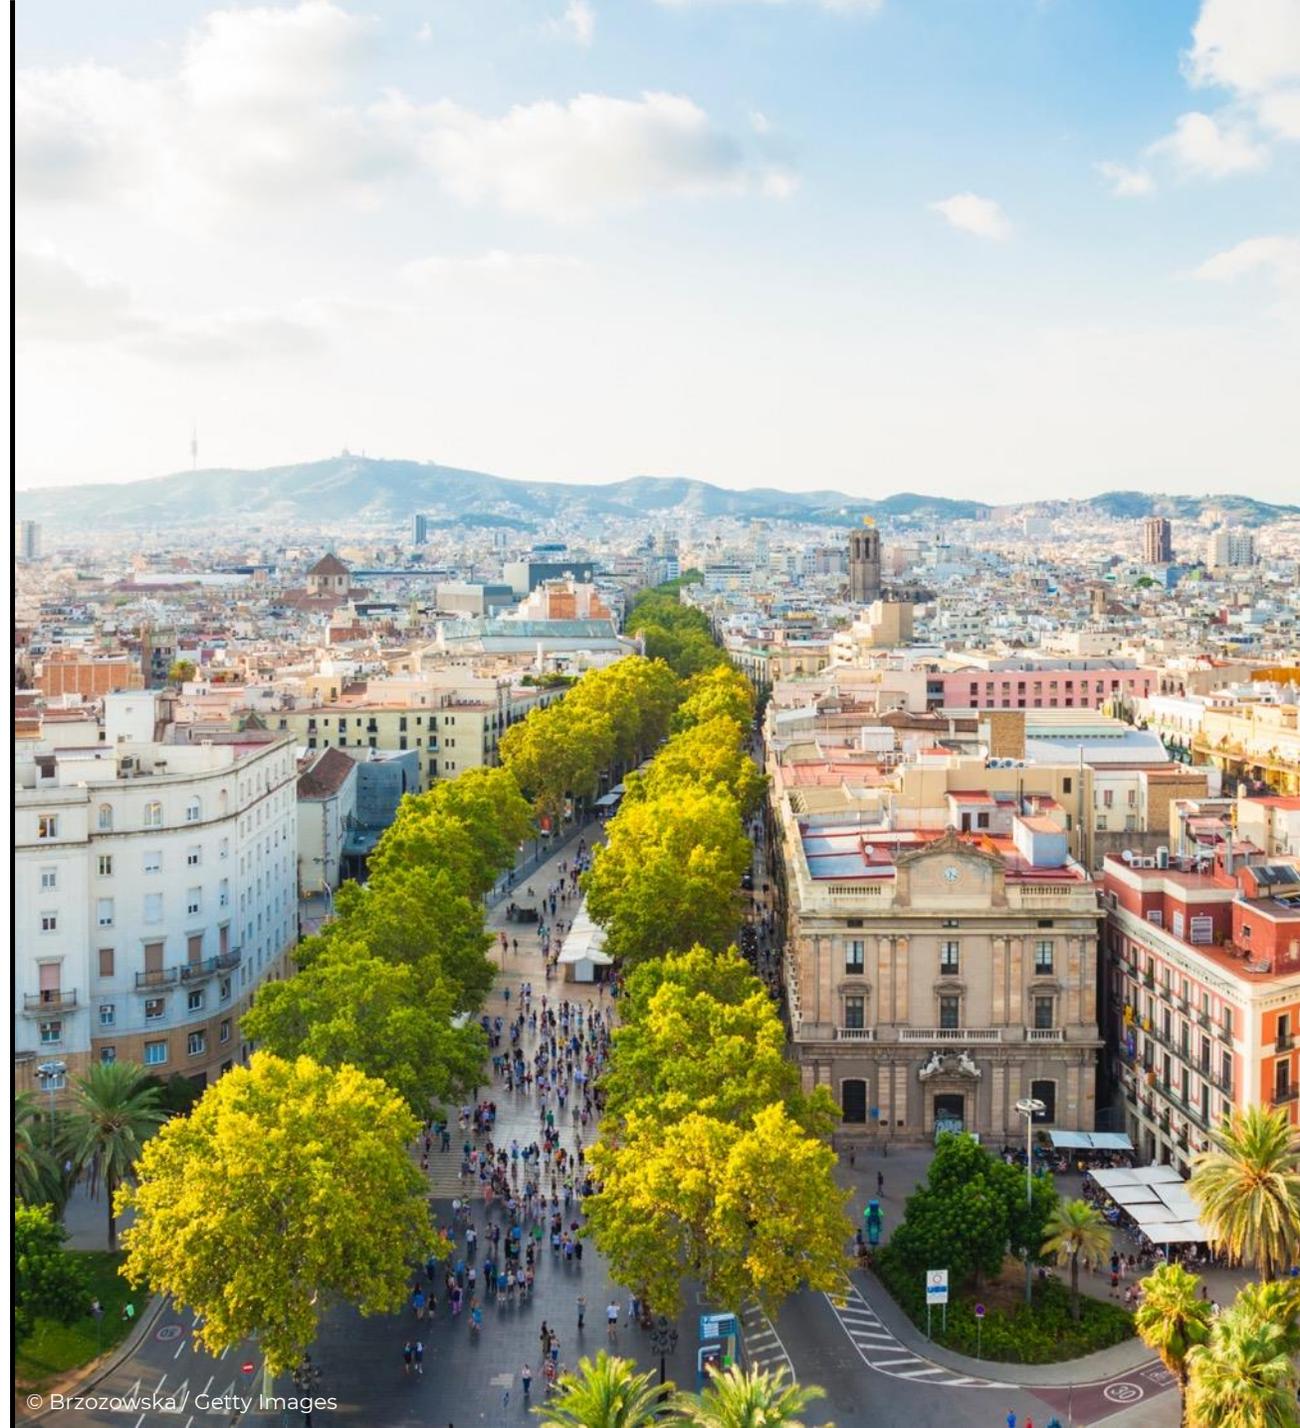

Air Sensors International Conference

Friday, May 13th 2022

Cities contribute to climate change but cities are also home to solutions...

Cities are:

- Diverse and innovative.
- More nimble and progressive than nation states.
- Financial and economic hubs with political and monetary power.
- **And led by dynamic mayors who are:**
 - Advocates for a green and just recovery from COVID-19.
 - Global leaders in the fight against the climate crisis.

C40 is a network of mayors of nearly 100 world-leading cities collaborating to deliver the urgent action needed right now to confront the climate crisis. Together, we can create a future where everyone, everywhere can thrive.

Air quality

C40 works with cities to strengthen air quality management through increased data collection & analysis and policy development and implementation to put cities on a path towards meeting WHO guidelines

7 mil

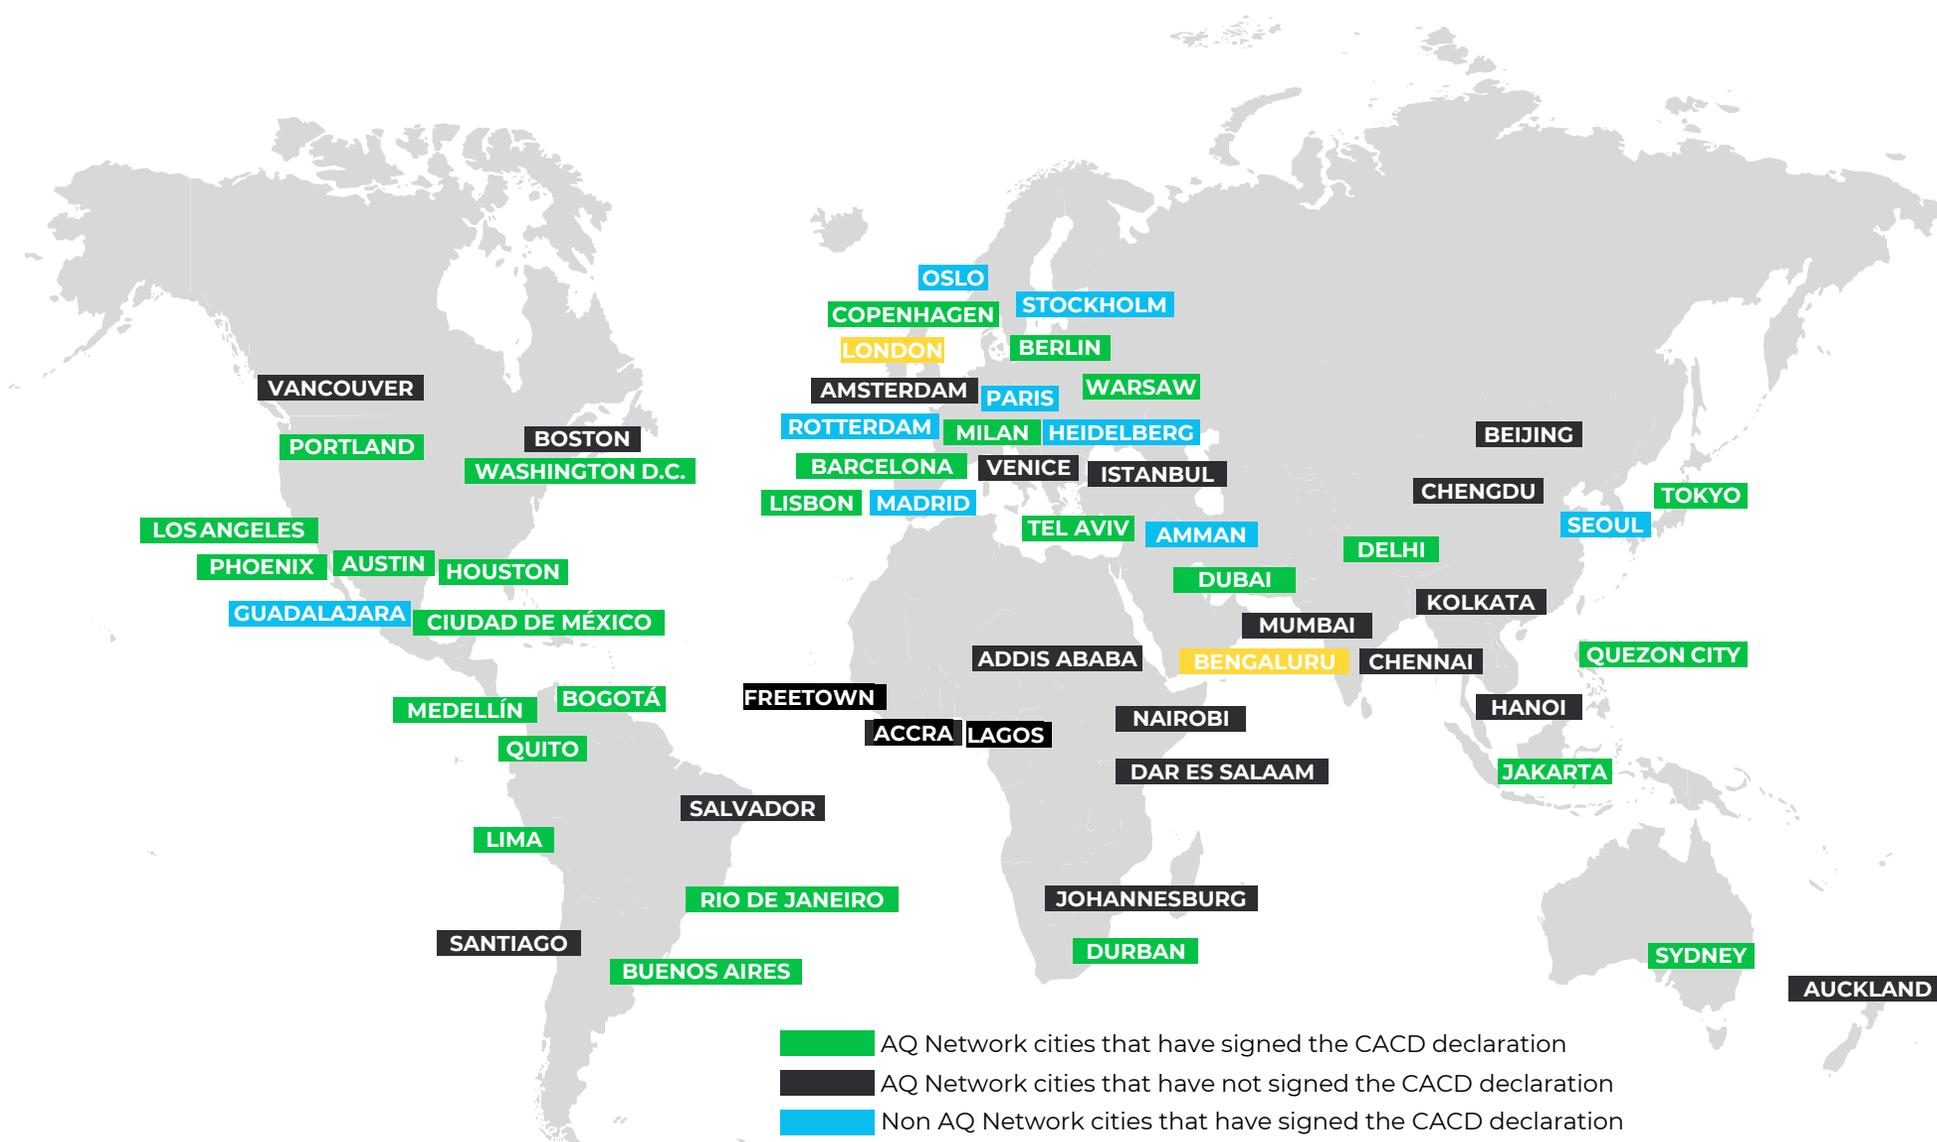

premature deaths each
year due to poor air
quality

98%

of urban areas have
PM2.5 concentrations
above the WHO AQGs

6X

more cities are now
monitoring air quality,
compared to 10 years
prior

- AQ Network cities that have signed the CACD declaration
- AQ Network cities that have not signed the CACD declaration
- Non AQ Network cities that have signed the CACD declaration
- AQ Network chair cities (both signed the CACD declaration)

C40 lower-cost sensor working group

- A forum for interactive knowledge-sharing and problem-solving
- Insights and experiences from a diverse cohort of cities
- Best practices, recommendations, case studies

Report available at:

SENSING CHANGE

How cities are using new sensing technologies to achieve air quality goals

Release Date: May 2022

Sensing Change: Themes

1.

**Increasing quality,
accessibility and
clarity of city-scale
data & information
platforms**

2.

**Understanding
impacts on
vulnerable
populations**

3.

**Informing decision-
making and policy
processes**

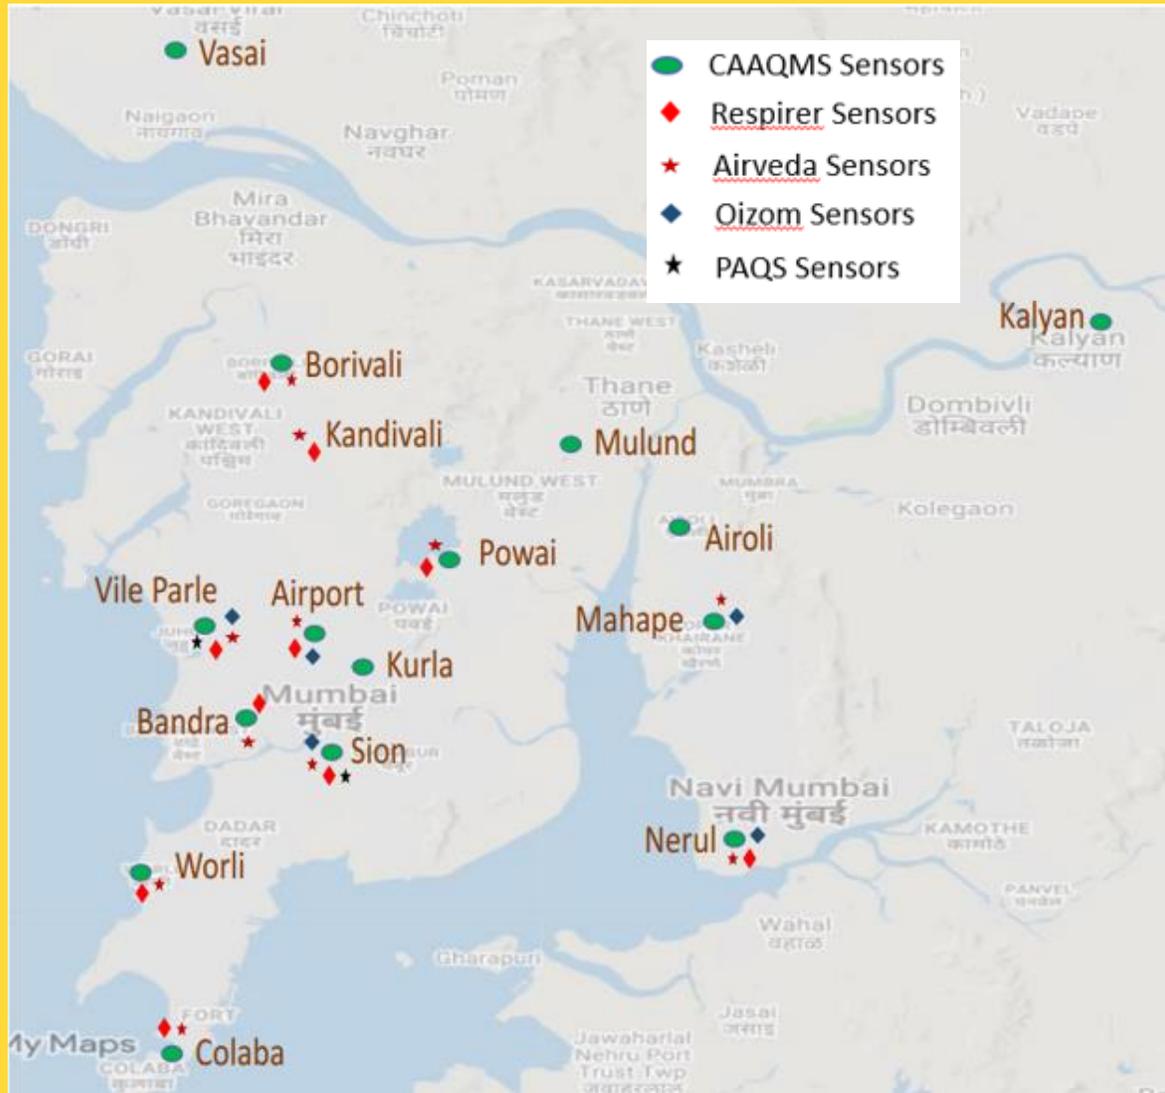

Dar es Salaam, Tanzania:

Collecting basic information about air pollution levels

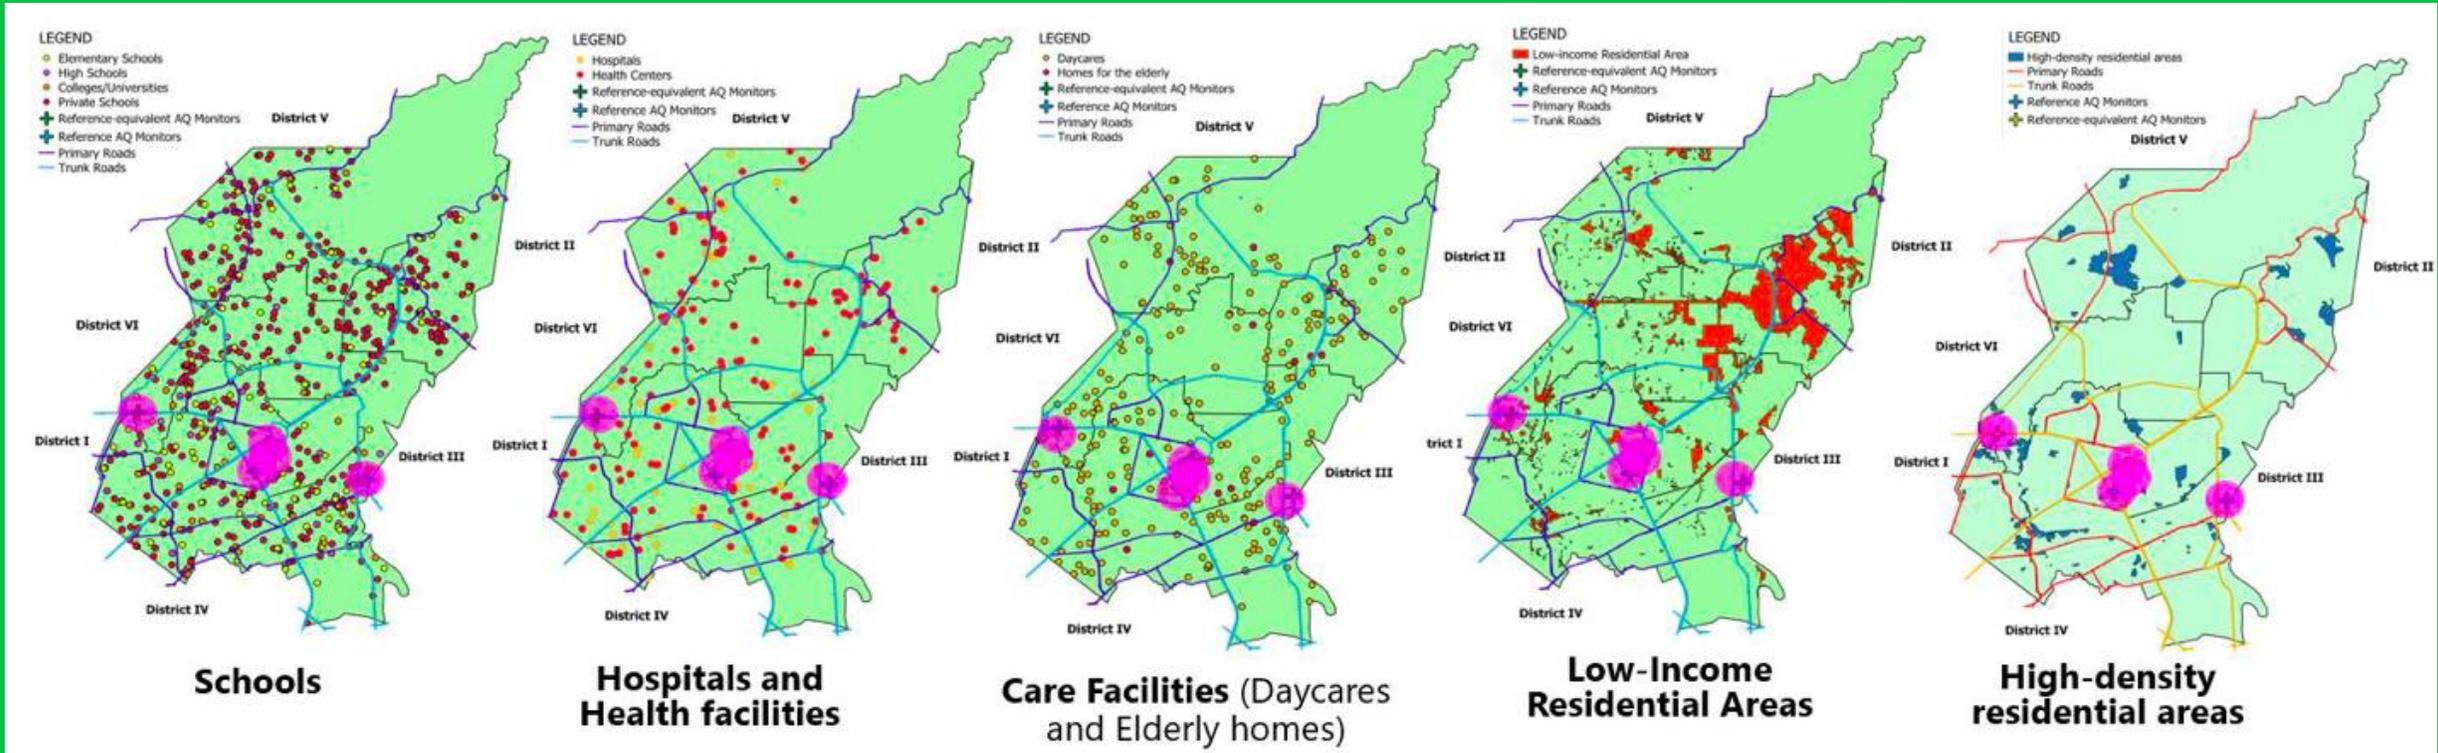

Mumbai, India:

Piloting lower-cost sensors for national adoption

Quezon City, Philippines:

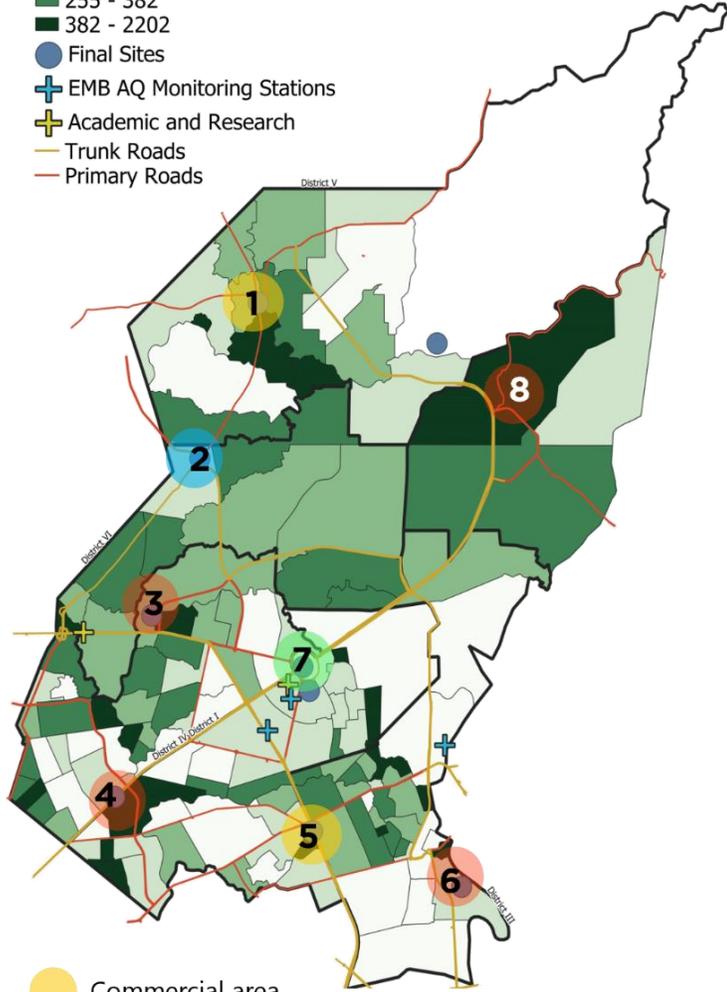

Collecting baseline data and identifying hotspots

**QC Population Density per barangay
(persons per hectare)**

- 24 - 131
- 131 - 200
- 200 - 255
- 255 - 382
- 382 - 2202

- Final Sites
- ⊕ EMB AQ Monitoring Stations
- ⊕ Academic and Research
- Trunk Roads
- Primary Roads

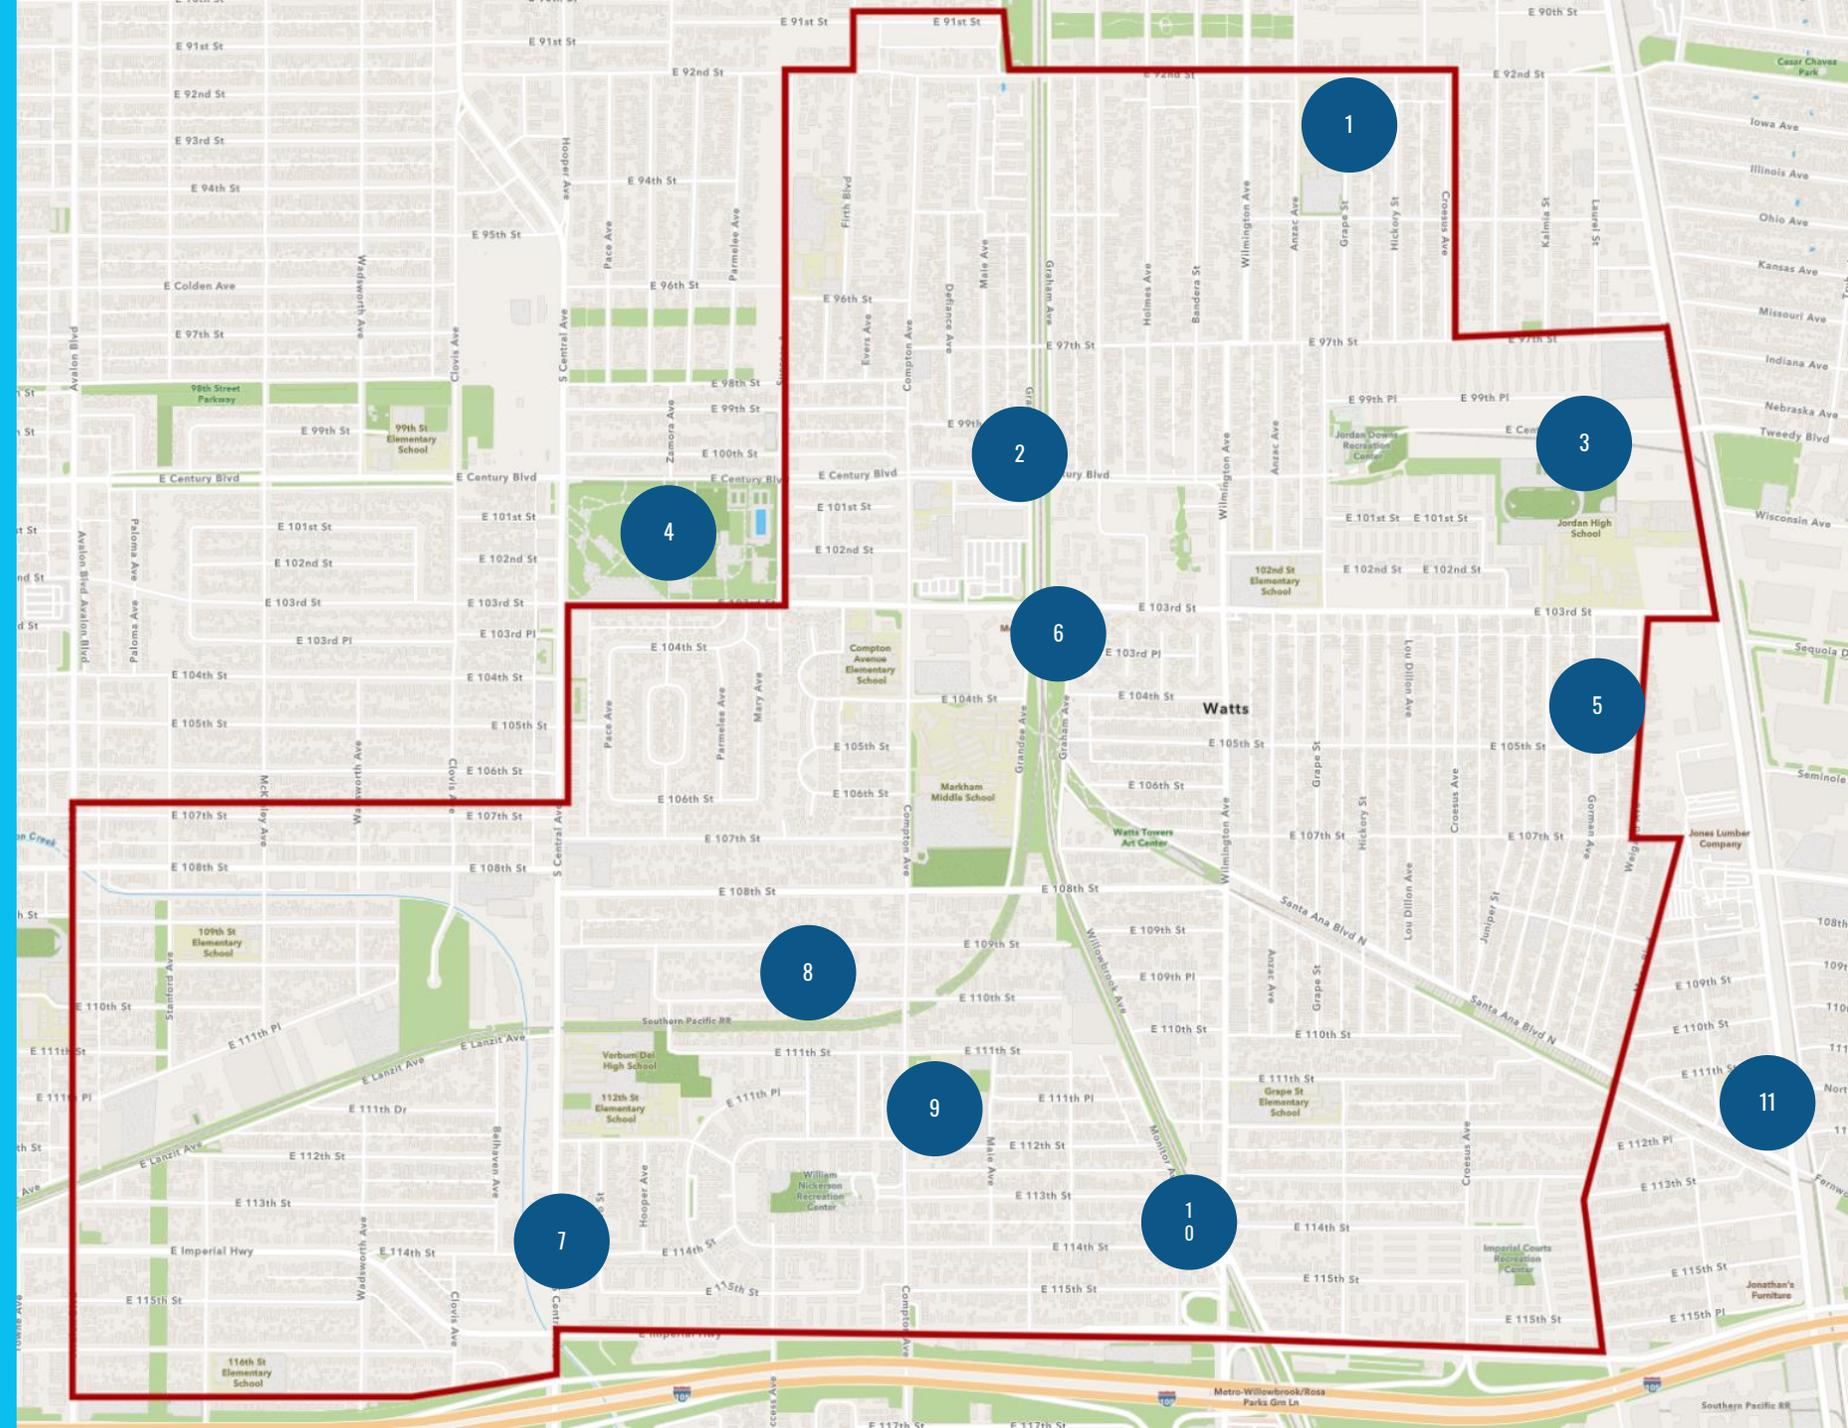

- Commercial area
- Green space (high foot traffic; background site)
- Roadside with high foot traffic
- Church, Hospital, Residential area

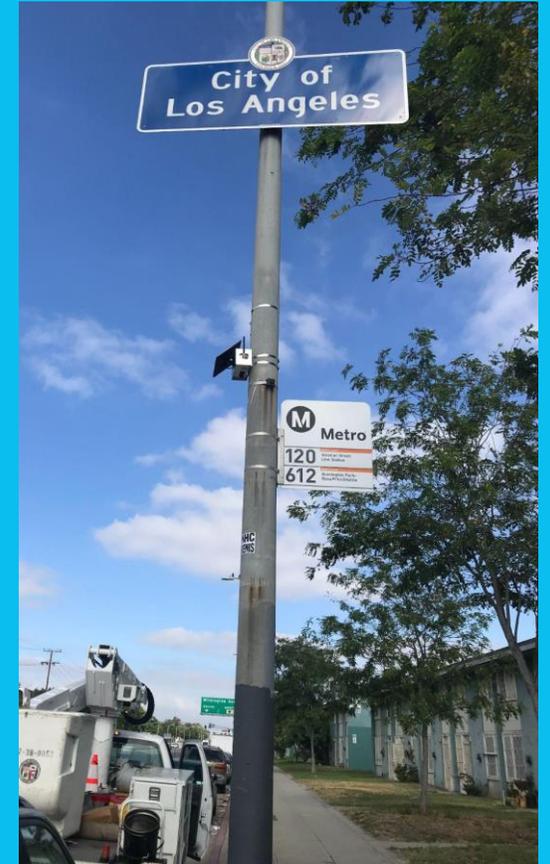

Los Angeles, United States:

Empowering
residents of
historically
disadvantaged
communities
with data
through
collaborative
approaches

Los Angeles, United States: Empowering residents of historically disadvantaged communities with data through collaborative approaches

New Resource:

Sensing change: how cities are using new sensing technologies to achieve air quality goals

Available on C40's Knowledge Hub:

tinyurl.com/sensingchange

Funding for this report, and several of the case studies, was provided by Bloomberg Philanthropies and the Clean Air Fund.

CITIES

New Air for Early Childhood Lima Project

Air quality monitoring network with a focus on children

Shelter

Hospital

School

Phases of the project

C4O CITIES

Main results

Determination of AQ and periods of least pollution per hour and day. This information will be useful in planning children's outdoor activities at times and days with less pollution.

Workshops to raise awareness and involve children in caring for the air

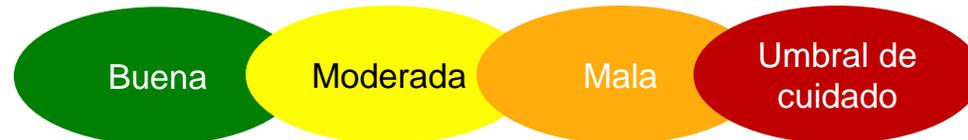

Dissemination of information

Newsletters with information from the network, available to all citizens

Average concentration of PM_{2.5}

	Lun	Mar	Mie	Jue	Vie	Sab	Dom

1st Intervention Based on Science

Before

PM10 diario, "Colegio Fe y Alegría"

1 Problem identified:

Exposure of boys and girls from the surroundings of Fe y Alegría N°4 school to highly polluted air.

2 Intervention objective:

Adapt a space in Los Olivos park that facilitates less exposure to polluted air and promotes the comprehensive development of children from 0 to 5 years of age hand in hand with their caregivers, under an eco-pedagogical approach.

Bare soil

No vegetation

Place for delinquency

After

Up to **45% improvement in air quality**

436 m²
planted with species

583 m²
of transformed space to avoid dust

81 m²
Recovered facade with art

Additionally:

- Neighbourhood **involvement**
- Implementation of a **calm zone and a safe route**
- **Low cost play furniture** placement

Projection in public spaces of messages about clean air and childhood

The Big Grey Bubble

ADDIS ABABA: Quality, Accessibility, and Clarity of City-Scale Data and Information Platforms

Fantu Kifle

ADDIS ABABA ENVIRONMENTAL PROTECTION AGENCY

love my air

Empowering communities to live better and longer by reducing air pollution and limiting exposure through behaviour change, advocacy and community engagement

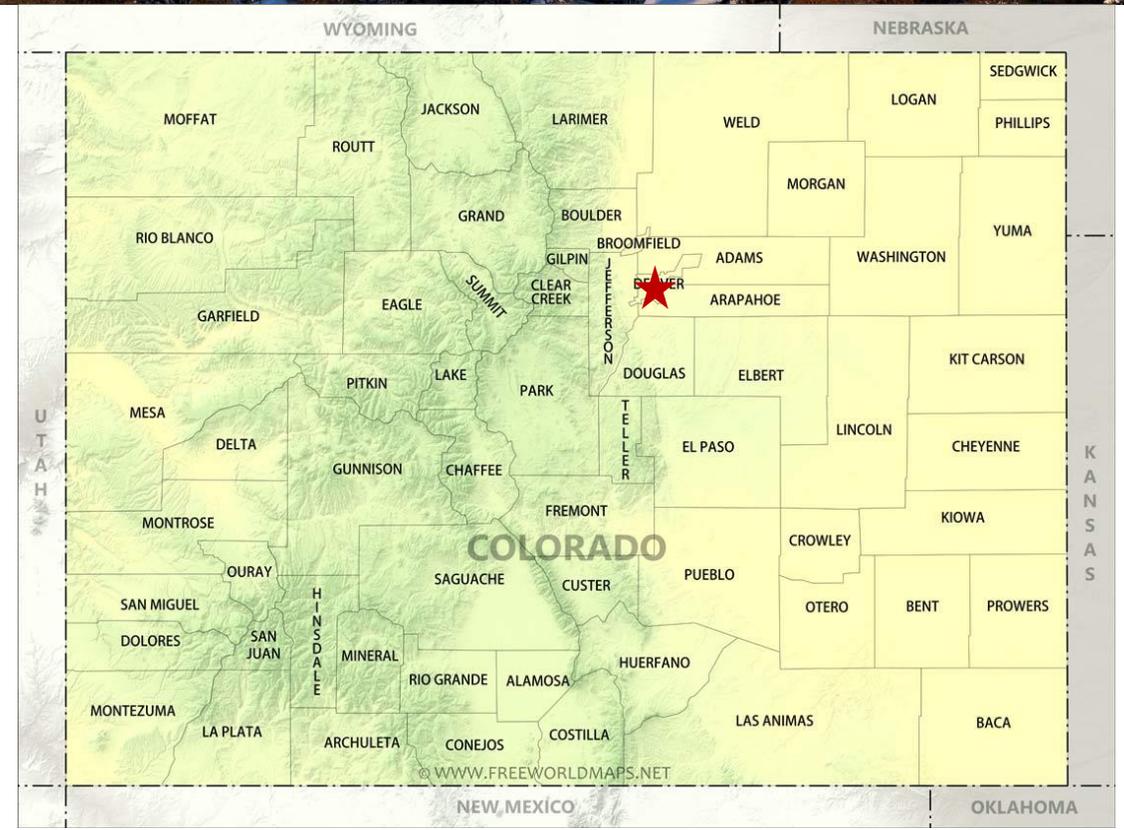

**Aubrey Burgess, Love My Air Program
Manager
City and County of Denver**

City & County of Denver

- Denver, Colorado has the 36th worst air quality among major US cities
- Only 53% of Denver residents realize the potential effects of poor air quality, such as increased asthma rates and symptoms
- Denver families spend an average of \$3,100 a year on asthma-related medical costs

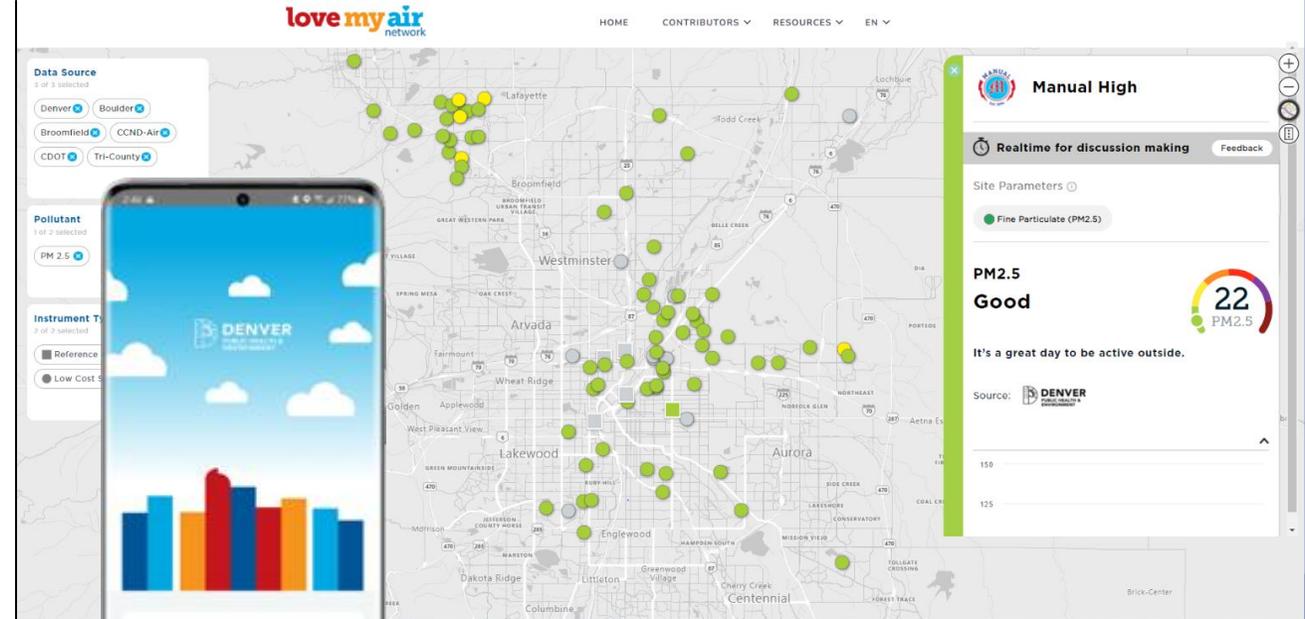

The Solution: The City and County of Denver is working to improve air quality by installing cutting-edge air pollution sensors around schools. The program provides data and programmatic options for adoption by schools to allow for customised solutions tailored to the unique needs of individual school communities.

American Lung Association. (2021). State of the Air 2021.
United States Census Bureau. (2019). Estimates of Resident Population Change and Rankings: July 1, 2017 to July 1, 2018 - United States -- Metropolitan Statistical Area; & for Puerto Rico.
Photos: Marriott, One Stop Map

Data accessibility

- Increase air quality literacy
- Develop an approachable, public-facing brand
- Work with other regional partners
 - Municipalities
 - Public health agencies
 - Research institutions
 - Industry leaders
- Phone app and web dashboard

AirSense

Using data to make decisions

- Individual
 - Empowered to reduce contribution and exposure to pollution
 - Real-time health-based messaging
- School
 - Outdoor activity guidance
 - Implement anti-idling campaigns
- City
 - Institute best practices around construction, traffic
 - Advocate for state policy
 - Clean air shelters
- Regional
 - Coordinated wildfire response
 - Free transit days
 - Consistency in monitoring and messaging

AIR QUALITY OUTDOOR ACTIVITY GUIDE

Spending time outside in bad air quality can have an impact on your health. This chart helps you decide what outdoor activities are safer for you during different air quality conditions. The chart uses the U.S. Environmental Protection Agency's (EPA) Air Quality Index (AQI) to report how polluted air. The AQI has six categories, each with a color and health level. For each level, the chart provides advice on what you should do outside.

	Good 😊 0-50	Moderate 😐 51-100	Unhealthy for Sensitive Groups 😞 101-150	Unhealthy 😡 151-200	Very Unhealthy 😱 201-300	Hazardous 😵 301-500
Recess (15 minutes)	Enjoy outdoor activities!	Good day to be outside!	It's okay to be outside for short activities.	Consider exercising indoors and take more breaks, possibly reschedule activities.	No outdoor activity.	No outdoor activity.
Gym Class (1 hour)	Enjoy outdoor activities!	Good day to be outside!	It's okay to be outside for short activities.	Consider exercising indoors and take more breaks, possibly reschedule activities.	No outdoor activity.	No outdoor activity.
Athletic Practices (2-4 hours)	Enjoy outdoor activities!	Good day to be outside!	It's okay to be outside for short activities.	Exercise indoors or limit hard outdoor activity with increased breaks.	No outdoor activity.	No outdoor activity.
Sports Leagues or Events (4-8 hours)	Enjoy outdoor activities!	Good day to be outside!	It's okay to be outside for short activities.	Exercise indoors or limit hard outdoor activity with increased breaks.	No outdoor activity.	No outdoor activity.

Love My Air Denver is a partnership program of Denver's Department of Public Health and Environment and Denver Public Schools.

Ozone Action Alert

in effect until midnight Tonight

Poor Air Quality Conditions Today. Take Action.

Protect

Ozone levels are high - stay indoors today to protect your respiratory health.

Prevent

Do your part - combine car trips by picking a single errand day this week.

Ok

Thank you!
